

2.1.1

The planetarium

Main objective: Turn on all the crystals at the same time

Reward: Quest progression

Linked quest: [4000](#)

Requirements: Sextant upgrade & astronomer opens the door

Accessible in the 3rd and 4th time slot

General map

The crystals are arranged to resemble the constellation of Aries and Libra; this puzzle is directly related to the astronomer's mission.

Perpendicular to each crystal, there is a light on the ceiling that lights up whenever the crystal is hit by a laser.

The player has a set number of mirrors and duplicating mirrors to light up all the crystals in the room and thus make the constellation appear on the ceiling.

There are more mirrors in each room than are needed to complete the puzzle, so it is a little more accessible

Reward

Crystal

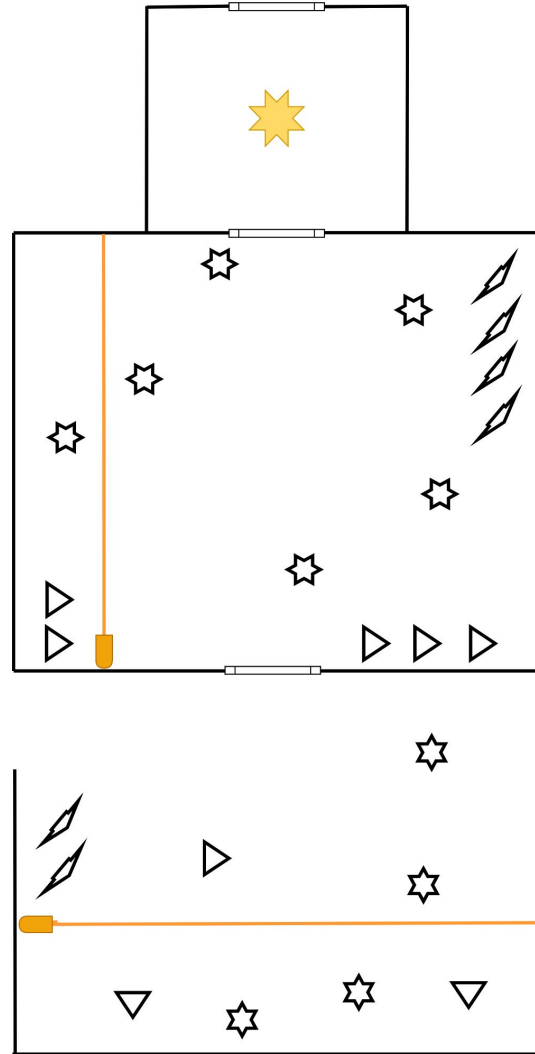

Duplicator mirror

Door

Laser emitter
